Biological maternal grandfather: 1947, died of natural causes.

Biological paternal grandmother: 1944, healthy.

Biological paternal grandfather: 1941, healthy.

Why did she decide to become a donor:

I was always interested in volunteering, charity and donation, all my life I was trying to help someone in need. When I found out I can donate my egg and somebody will have a child from it, it was just amazing, I realized I have to do it! I am so happy to know I will be a part of the most valuable gift ever, the gift of life! I cannot wait to start the donation process, I am sure it will be an interesting experience.
